The Tab-Pro™ is a simple, rugged machine that can be setup quickly for production runs. Stop outsourcing profitable tab jobs. With minimal training, your semi-skilled laborer can produce high quality tabs quickly. You will lower your cost and be able to quickly respond to your customer’s deadlines. The price and space requirements are minimal, so any size shop can get a profitable share of the growing index tab market.

Cuts 2,000-5,000 tabs per hour. Although this rapid fire machine is capable of cutting up to 10,000 tabs per hour, you can train your semi-skilled operator, with minimal experience, to produce at a rate of 2,000-5,000 tabs per hour. The instant the sheet hits a micro-switch, knives rotate down, cut and return to the open position ready for the next sheet. Use this ‘bulldog’ tough machine to cut laminated and non-laminated sheets from 6-point to 25-point paper. Feed several non-laminated sheets at a time and get even higher production rates. A fixed, full-length side guide makes sure that every sheet aligns properly to give your customers the quality they expect.
Safe and Simple Operation. A full-length safety bar protects the operator’s fingers from the knives while rapidly inserting sheet after sheet. To change or adjust knives, the tabletop tilts which automatically cuts off electricity to the machine. Making it inoperable and safety conscious.

Setup so Fast and Easy, RUSH Jobs are Never a Problem. One operator can have the Scott Tab-Pro up and running in just a few minutes so you can be the hero when competitors turn away small rush jobs. It takes just seconds to change tab position - simply loosen two handles, slide the tabletop to reposition the side guide, and re-tighten the handles. Changing tab sizes takes only two minutes. Tilt the tabletop, loosen four screws, reposition the knives and re-tighten the screws. To change tab extension simply change the knives.

Handles Many Sheet Sizes. The extra-long, tool steel knives quickly and easily cut a 1/2 inch (25.4mm) tab in the first position on a 15 inch (381 mm) long sheet. As the tab widens or the tab position moves toward the center of the sheet, the sheet size capability increases accordingly.

Precision Cut A Variety of Tabs and Step-Cuts. Adjust tabs to any width from 1/2 inch to 6 inches (12.7 mm to 152.4 mm) by simply moving the knives closer or farther apart. To cut only one side of a tab (step-cut) remove one knife blade and cut a maximum width of 13 1/2 inches (342.99 mm) long.

Minimal Maintenance Keeps this Machine Cutting for Years. No one builds a stronger, more rugged Tabcutter than Scott-Precision. Our Knives are made from tool steel, hardened and precision ground. Mounted on a 2-inch (51 mm) diameter steel arbor supported by ball bearings, these knives precisely cut thousands of sheets before they need re-sharpening. The solid, cast-iron machine body drastically reduces vibrations even on the toughest cutting jobs to further ensure accurate cutting.

**Specifications**

- **Speed:** 2,000-5,000 tab cuts per hour
- **Sheet Size:**
  - maximum: 15” with a half inch inset on a 1 inch tab (381mm with a 12.7mm inset cut on a 25.4mm tab)
  - minimum: any width x 5 1/2” (139.7mm minimum depth)
- **Paper Weight:** 6-point to 25-point paper
- **Tab Cut Size:**
  - maximum: 6” (152.4mm) minimum: 1/2” (12.7mm)
  - Step cut: 13-1/2” (342.9mm) maximum
- **Knives:** Hardened, precision ground steel
- **Standard Knife Sizes:** 1/4”, 3/8”, 1/2”, 5/8”, 3/4” (6.3mm, 9.5mm, 12.7mm, 15.9mm, 19.1mm)
- **Electrical Requirement:** 0.5 amp, 120 VAC, 50-60 Hz
- **Air Requirements:** 2 cubic ft. per minute (944 cubic cm per second) at 80 lbs. pressure. Built in pressure regulator and filter.
- **Tab Pro etc. requires no air.**
- **Lubrication:** Fully Automated
- **Table Top:** 48” x 15 3/4” x 3/8”

There’s responsibility that comes with being a leader.

It’s that unique obligation to be there for your customers at all times and for all reasons. Scott-Precision fully embraces that responsibility. As the unquestionable leading supplier of tab cutting, laminating and reinforcing machines as well as laminating film for index tab divider products, Scott-Precision set it sights high from the very beginning. It’s that commitment to excellence that has kept them at the top since the industry was born more than 40 years ago.
